ZL-9001A

Computer Controlled Carton Compression Testing Machine

800 x 800 x 800 mm compression space for corrugated cartons and packaging containers.

Product overview

The ARMSTRONG ZL-9001A is a computer-controlled carton compression testing machine for assessing the load-bearing ability of corrugated cartons and packaging containers. The supplied documentation specifies an 800 x 800 x 800 mm compression space, a 1000 kgf load cell and TM2101 control software. Discuss carton dimensions, expected force, compression or holding requirements and report needs before selecting the test configuration. Confirm the maximum permitted operating load and supplied accessories in the quotation.

Technical specifications

Capacity	1000 kgf load cell (approximately 9.81 kN); operating limit confirmed in quotation
Compression space	800 x 800 x 800 mm
Control	Computer control with TM2101 software
Drive System	Servo motor with twin ball screws
Tests	Carton and packaging container compression
Power supply	Single-phase 220 V, 50 Hz; confirm machine nameplate
Test method	Agreed packaging compression method; confirm applicable standard and edition

Typical applications

Corrugated carton manufacturers / Packaging quality control / Factory packaging laboratories

Configuration & quotation

Send the specimen material and dimensions, required force range, test method and factory location. Confirm the supplied machine, fixtures and accessories in the quotation.

Specifications are reference values for configuration review. Contact Hung Ta Instrument for the current supplied configuration.
